

Private Label Hypochlorous Acid Skincare Cleanser

Our Hypochlorous Acid skincare cleanser, made in the USA in our ISO 9001:2015 certified facility, is a versatile addition to your skincare routine. HOCl, a natural compound comprising hydrogen, oxygen, and chlorine, is one of the biologically active molecules that white blood cells produce to fight infection. This makes our product not just effective, but also safe and non-toxic. With a composition of .020% hypochlorous acid (HOCl) and 99.980% purified water, our skincare spray is a versatile tool for your daily cleansing needs, makeup, body tools, and personal care items. It is free of alcohol, fragrances, parabens, gluten, dyes, quaternary ammonium, surfactants, solvents, preservatives, and oil, giving you the freedom to use it in various ways.

FEATURES & BENEFITS

With a pH that mimics the skin, hypochlorous acid skin cleanser can be used on all skin types to cleanse pores, remove dirt, oil and impurities that often lead to breakouts and other skin issues.

APPLICATION

Apply several sprays to the skin, morning and night. Let air dry before applying moisturizer. Use as frequently as needed or desired.
